Below are lists of the various features in the template release from core template features to integrated extensions support.

Top Features

1 **6 Preset Styles:** An array of 6 stunning, unique, and professionally designed style variations, in 18 combinations of Standard, Simple & Full modes.

2 **Scroller Module:** RokIntroScroller makes a return in an integrated capacity, a perfect mechanism to showcase horizontal content with scrolling functionality.

3 **Fusion Menu:** Powerful new dropdown menu with javascript transitions, menu icons, subtexts and multi-column support.

Core Template Features

Below is a list of the core template features which pertain to this release.

- SEO Structure / Layout:
       A structure catered to the needs of search engine optimisation with a main-left-right code layout.
- Basic K2 Styling
      Basic styling for the K2 component by JoomlaWorks
- Javascript Styling: Radios and Checkboxes
      Additional styling for form elements, such as radios and checkboxes, for visual integration.
- IE6 Warning Message
       A dropdown panel will appear in IE6, alerting the visitor to update their browser. This can be disabled in the template parameters.
- Content Typography
       Customised typography, such as list styles and span notices, are included with this release.
- 28 Module Positions
      The template has 28 module positions which are collapsible.
- Browser Compatibility
      The theme is compatibility with all the major and modern browsers: FF 3.5, Safari 4, Opera 10, IE6, IE7 & IE8.   *Some features may only appear in certain browsers such as text*
