

Style Control

Written by Administrator

Tuesday, 22 September 2009 14:30 - Last Updated Wednesday, 30 September 2009 17:33

Preview all available Preset Styles and any associated combinations on the [Style Variations](#) page.

You can control the style options of the **Infuse** template from the Joomla administrator template manager. Here you can choose from one of the Preset Style combinations, or create your own Custom *preset* all from the administrator.

You need to set **Preset Style** to **Custom** in **Extensions** ▢ **Template Manager** ▢ **rt_infuse_j15** for the configuration options to work.

The options are as follows, and the areas that they control are indicative in their name:-

- **Header Style:** Full, Standard or Simple
- **Body Style:** Style 1 to Style 6

Creating your own Preset Styles

- Login to the Joomla Administrator
- Go to **Extensions** ▢ **Template Manager** ▢ **rt_infuse_j15**
- Set **Preset Style** to **Custom**
- Choose your desired style options
- Hit **Custom Style** in the top right button menu
- Copy the code from the **Custom Style Output** box.
- Go to `/templates/rt_infuse_j15/styles.php`
- Edit the code between `array()` with your copied code block
- Save and upload

We recommend that you keep the original style1... names and just modified the other elements, for compatibility reasons.
